

# PRIORITY MEDICINES AND MEDICAL SUPPLIES

## LaNave Project – Donations to Cuba

*List of priority needs for healthcare donations.*

This document summarizes, in English, the priority items indicated in the official needs list for donations to Cuba.

### PHARMACEUTICAL PRODUCTS AND MEDICINES

| Nº | Product / Medicine Description                |
|----|-----------------------------------------------|
| 1  | Ringer's lactate solution 500 ml              |
| 2  | % Dextrose bottle 500 ml                      |
| 3  | 0.9% Sodium chloride bottle 500 ml            |
| 4  | 20% Hypertonic sodium chloride vial 10 ml     |
| 5  | 8% Sodium bicarbonate vial                    |
| 6  | 0% Calcium chloride vial 10 ml                |
| 7  | Potassium chloride 1.86 injectable vial 10 ml |
| 8  | 10% Calcium gluconate injectable vial 10 ml   |
| 9  | Injectable potassium gluconate vial 20 ml     |
| 10 | Omeprazole vial                               |
| 11 | Dipyrone 600 mg vial                          |
| 12 | Human albumin 20% bottle 50 ml                |
| 13 | Liquid gelatin (plasma expander)              |
| 14 | 10% Amino acid solution bottle 500 ml         |
| 15 | Low-molecular-weight heparin                  |
| 16 | Sodium heparin bottle                         |
| 17 | Hydrocortisone bottle                         |
| 18 | Amoxicillin + Sulbactam bottle (clavulanate)  |
| 19 | Ampicillin bottle                             |
| 20 | Ceftriaxone bottle                            |
| 21 | Cefepime bottle                               |
| 22 | Meropenem bottle                              |
| 23 | Colistin bottle                               |
| 24 | Aztreonam bottle                              |

| N° | Product / Medicine Description                                              |
|----|-----------------------------------------------------------------------------|
| 25 | Tigecycline bottle                                                          |
| 26 | Doxycycline tablets                                                         |
| 27 | Dipyrone 500 mg tablets (Metamizole)                                        |
| 28 | Paracetamol 500 mg tablets                                                  |
| 29 | Diphenhydramine tablets                                                     |
| 30 | Oral rehydration salts                                                      |
| 31 | Chlorhexidine acetate, 5 kg container                                       |
| 32 | 10% Povidone-iodine, 120 ml bottle                                          |
| 33 | Oral contraceptives and condoms                                             |
| 34 | Folic acid                                                                  |
| 35 | Gauze roll, 45 cm × 7,500 cm (for dressings and swabs)                      |
| 36 | Cholera test kits                                                           |
| 37 | Immunochromatographic rapid diagnostic test strips for dengue (NS1/IgG/IgM) |
| 38 | COVID PCR test kits (assays/determinations)                                 |
| 39 | Abate 1%                                                                    |
| 40 | Cypermethrin 25%                                                            |
| 41 | Vertox O rodenticides                                                       |
| 42 | Residual chlorine testing kits                                              |
| 43 | DPD 1 tablets                                                               |
| 44 | Nylon bags for water and food sampling                                      |

## CONSUMABLE MEDICAL SUPPLIES

| N° | Product / Medicine Description                                                                                         |
|----|------------------------------------------------------------------------------------------------------------------------|
| 1  | Absorbent cotton, 100% cotton fibers, minimum whiteness grade 80%, carded or combed, 1-lb packs, bundles of 100 packs  |
| 2  | Infusion set with 20G × 1½" needle, plastic, with air vent, tubing minimum 1550 mm, plastic flow regulator             |
| 3  | Blood transfusion set with 18G × 1½" needle, plastic, without air vent, plastic flow regulator, tubing minimum 1550 mm |
| 4  | 10 ml plastic syringe with 20G × 1" needle                                                                             |
| 5  | 20 ml plastic syringe with 20G × 1" needle                                                                             |
| 6  | 5 ml plastic syringe with 20G × 1½" needle                                                                             |
| 7  | Sterile latex examination gloves, size M                                                                               |

| Nº | Product / Medicine Description                                                      |
|----|-------------------------------------------------------------------------------------|
| 8  | Sterile latex examination gloves, size L                                            |
| 9  | Sterile latex surgical gloves, size 7                                               |
| 10 | Sterile latex surgical gloves, size 7½                                              |
| 11 | Sterile latex surgical gloves, size 8                                               |
| 12 | Polyurethane IV catheter, double lumen (16G/16G), Seldinger guidewire, Ch 7 × 20 cm |
| 13 | Polyurethane IV catheter, single lumen, Seldinger guidewire, 14G                    |
| 14 | Polyurethane IV catheter, single lumen, Seldinger guidewire, 16G                    |
| 15 | Central venous catheter, triple lumen (16G/18G/18G), Ch 7 × 20 cm – Ref. 4167408    |
| 16 | Plastic intravenous trocar with wings and injection port, 18G                       |
| 17 | Plastic intravenous trocar with wings and injection port, 22G                       |
| 18 | Plastic intravenous trocar with wings and injection port, 20G                       |
| 19 | Plastic intravenous trocar with wings and injection port, 16G                       |
| 20 | Foley balloon catheter, 2-way, balloon 3/5 ml, Ch 8                                 |
| 21 | Foley balloon catheter, 2-way, balloon 3/5 ml, Ch 10                                |
| 22 | Foley balloon catheter, 2-way, balloon 5/15 ml, Ch 14                               |
| 23 | Foley balloon catheter, 2-way, balloon 5/15 ml, Ch 16                               |
| 24 | Foley balloon catheter, 2-way, balloon 5/15 ml, Ch 18                               |
| 25 | Foley balloon catheter, 2-way, balloon 5/15 ml, Ch 20                               |
| 26 | Three-way plastic stopcock with rotating Luer Lock connector                        |
| 27 | Uncuffed endotracheal tube, internal diameter 2.5 mm                                |
| 28 | Uncuffed endotracheal tube, internal diameter 3.0 mm                                |
| 29 | Uncuffed endotracheal tube, internal diameter 4.0 mm                                |
| 30 | Uncuffed endotracheal tube, internal diameter 3.5 mm                                |
| 31 | Cuffed endotracheal tube, 2.5 mm, with Murphy eye                                   |
| 32 | Cuffed endotracheal tube, 3.0 mm, with Murphy eye                                   |
| 33 | Cuffed endotracheal tube, 3.5 mm, with Murphy eye                                   |
| 34 | Cuffed endotracheal tube, 7.0 mm, with Murphy eye                                   |
| 35 | Cuffed endotracheal tube, 7.5 mm, with Murphy eye                                   |
| 36 | Suction catheter with control valve, Ch 8                                           |
| 37 | Suction catheter with control valve, Ch 10                                          |
| 38 | Butterfly needle for phlebotomy, 20G × ¾"                                           |
| 39 | Butterfly needle for phlebotomy, 21G × ¾"                                           |
| 40 | Butterfly needle for phlebotomy, 22G × ¾"                                           |

| N° | Product / Medicine Description                                                              |
|----|---------------------------------------------------------------------------------------------|
| 41 | Polyglycolic acid (PGA) suture, rapid/medium/extended absorption, sizes 0, 1, 2/0, 3/0, 4/0 |
| 42 | Nylon (polyamide) suture, sizes 0, 1, 2/0, 3/0, 4/0                                         |
| 43 | Polydioxanone (PDO) suture, sizes 0, 1, 2/0, 3/0, 4/0                                       |
| 44 | Chromic catgut suture, size 0, blunt needle, 40 mm half-circle                              |
| 45 | Chromic catgut suture, size 1, blunt needle, 40 mm half-circle                              |
| 46 | Chromic catgut suture, size 2/0, blunt needle, 40 mm half-circle                            |
| 47 | Blood bags                                                                                  |
| 48 | Colostomy bags                                                                              |
| 49 | Urine collection bags                                                                       |

*Note: The complete list, including the categories Equipment, Furniture, Non-Medical Supplies, Basic Services, and Transport, is available upon request. Please note that only medicines and materials in solid form with a long shelf life are accepted for shipment through the LaNave Project.*
